Allowable Subject Matter

Claims 1- 8 are allowable.

The following is an examiner's statement of reasons for allowance: The applicant teaches in the specific polarity orientation of the magnets on the upper end which allows the heddles to attract each other to reduce the risk the heddles forming an "X" shape (Pg. 2 lines 35-39) that is not shown in the prior art, in particular Gaisser (US 4,987,928). Gaisser teaches magnets in the upper end of the heddle, but the polarity is arranged to support the half heddle in a magnetized coupling. (Col. 1 lines 39-42)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gaisser (US 4,987,928) teaches a magnet in the upper end for use in linking the two full healds to the half heald. Klocker (US 5,040,571 and US 5,048,573 and US 4,967,802) and Hockemeyer (US 6,116,291 and 6,102,080) teach the state of the art.
